

Established in 1986, POSTECH is now moving ahead as a flagship university in the development of science and technology around the world.

For nearly 35 years, we have committed to nurturing global leaders, performing outstanding research, and creating social value for the next generation. With our continuous effort and dedication, POSTECH has risen to become a world class university by emphasizing well-rounded as well as specialized education to produce intellectuals with integrity, creativity, and challenging spirit.
