

## APPLY NOW: Project-oriented internship enhancing international experience

The Alu Menziken Group with locations in Switzerland, Austria and Romania is an absolute expert in high-quality extruded products and complex assemblies that meet the highest requirements in terms of alloy properties, tolerances and surfaces. We operate one of the most modern aluminum extrusion lines within Europe. With extensive engineering expertise and many customer-oriented services, we bring aluminum into top form. Our areas of application are complex extruded products and components in pneumatics, industry & trade, construction and in sub- and ready-to-install systems for highly demanding niches in the automotive and aviation industries.

### We search for

- Late Bachelor or Master students (metallurgy, material science, engineering)
- «Hands-on process engineers» for cast house and metallography projects
- Self-organized, independent and project-work-oriented personalities
- German and English speakers (Hungarian or Romanian languages are a plus)
- Passionate Traveler

### We offer

- Min. 2-month internship
- International experience
- Attractive remuneration
- Insight into a multinational company
- On-sight optimization possibilities
- Potential scientific thesis

### Current projects

- **Optimization of Input Material Management (Scrap Control)**  
Operation Area: Cast House
- **Optimization of Billet Casting Parameters & Homogenization**  
Operation Area: Cast House & Metallography
